

QUALITY POLICY STATEMENT OF BTD

The company BTD is specialized in the research and development of internal combustion engines and alternative propulsion systems.

BTD puts its know-how at the service of its customers by offering customized solutions that meet their requirements in terms of quality, performance, cost and deadlines, and by using the best available industrial techniques.

Our approach to quality goes hand in hand with a systematic desire to move forward. This approach helps to convey a positive image of our company and thus strengthen customer loyalty.

BTD is committed to a quality management approach to professionally meet the needs and expectations of the various interested parties, as well as the standards, specifications, laws, and regulations applicable to our various services.

The following guidelines have been selected to guide our progress process :

- maximum use of the skills and technical know-how of our employees to improve the performance and reliability of our services;
- the optimization of our organization in general;
- continuous compliance with customer requirements and all legal aspects;
- working towards continuous improvement to ensure the preservation of the company;
- to make personalized customer service a matter of honor;
- promoting and anticipating the needs of the various protagonists through respect and attention;
- the establishment of partnership relationships with our suppliers as well as cost control.

We are committed to supporting all measures that enable the implementation of this quality policy and we invite all employees to actively participate in this process.
